PROFESSIONAL SUMMARY

Front-End Engineer with 7+ years of experience shipping interfaces, from company websites to complex multi-module platforms built with React, Next.js and TypeScript. Focused on reusable components with precise types, RTL-first responsive layouts and tight API integration, with an obsessive eye for UI detail and performance. Also works with PostgreSQL, Prisma and ASP.NET, with a machine-learning background.

EXPERIENCE

- **Front-End Developer · Sido, dental-clinic platform** 2025 – Present
 - Designed and built a multi-step dentist onboarding flow with document, logo and medical-license uploads plus full form validation.
 - Developed the recruitment module (job postings, drafts, hiring stages and rejected listings) and sped up its dashboard with status-count endpoints.
 - Implemented role & permission management (RBAC) and subscription creation with per-module selection.
 - Shipped back-office features: activity history, shift schedules, a call-center lead panel, clinic image collections and a TV queue display for waiting rooms.[React · Next.js · TypeScript · REST API · RBAC · RTL](#)
- **Web Designer & Developer · Freelance & agencies** 2019 – Present
 - Designed and built websites for advertising agencies, enterprise software (CRM & project management), a psychometric testing platform and a municipal news agency.
 - Clean, efficient code with strong programming logic, shipping responsive, SEO-friendly pages.
 - Maintained and extended existing projects, adding new sections to fit each stack.[JavaScript · jQuery · Ajax · Bootstrap · ASP.NET MVC](#)
- **Data Mining & ML · Personal & academic projects** 2023 – Present
 - Customer-churn prediction: EDA, preprocessing, visualization and model training with scikit-learn.
 - Solid grasp of data-mining fundamentals and Pandas, NumPy, Matplotlib and Seaborn.[Python · Pandas · scikit-learn · Jupyter](#)

FEATURED PROJECTS

GymPlan [Full-stack · in active development](#)

A full-stack training app for Persian-speaking lifters: build a plan exercise by exercise and share it as one permanent link. Coaches and students get their own panels, every set is logged, and the app suggests the next session's weights.

Impact: 2,000+ exercises with GIFs and muscles · 4 roles · 15 Postgres data models · 60+ Vitest tests
